1 [Automated negotiation from declarative contract descriptions](#)

Daniel M. Reeves, Michael P. Wellman, Benjamin N. Grosz

 May 2001 **Proceedings of the fifth international conference on Autonomous agents**

 Full text available: [pdf\(281.53 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Our approach for automating the negotiation of business contracts proceeds in three broad steps. First, determine the structure of the negotiation process by applying general knowledge about auctions and domain-specific knowledge about the contract subject along with preferences from potential buyers and sellers. Second, translate the determined negotiation structure into an operational specification for an auction platform. Third, map the negotiation results to a final contract. We have imp ...

2 [Mixed-initiative decision support in agent-based automated contracting](#)

John Collins, Corey Bilot, Maria Gini

 June 2000 **Proceedings of the fourth international conference on Autonomous agents**

 Full text available: [pdf\(905.66 KB\)](#) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

3 [Extending support for contracts in ebXML](#)

James Cole, Zoran Milosevic

 January 2001 **Australian Computer Science Communications**, Volume 23 Issue 6

 Full text available: [pdf\(947.74 KB\)](#)

[Publisher Site](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper describes our proposal for extending the current ebXML standard - to provide more comprehensive support for electronic contracts. The paper first presents the current status of major B2B initiatives, focusing on their support for electronic contracts. Having found the ebXML meta-model to provide a suitable contractual foundation, we examine the full extent of the requirements for supporting electronic contracts, and propose extensions to the ebXML meta-model to facilitate these requirements ...

4 [B2B contract implementation using windows DNS](#)

Ning He, Zoran Milosevic

 January 2001 **Australian Computer Science Communications**, Volume 23 Issue 6

 Full text available: [pdf\(863.94 KB\)](#)

[Publisher Site](#)

 Additional Information: [full citation](#), [abstract](#), [references](#)

This paper describes our implementation of a support infrastructure for electronic contracting --- an important ingredient of Business-to-Business (B2B) e-commerce. The paper first explains the main benefits of the new generation of Microsoft technologies -

Windows Distributed interNet Applications Architecture (DNA) and BizTalk. This is followed by a detailed description of how we take advantage of the XML tools provided by these technologies - to implement our enterprise model of contracts. We ...

5 Session 1C: trust and reputation: Supervised interaction: creating a web of trust for contracting agents in electronic environments

Martin J. Kollingbaum, Timothy J. Norman

July 2002 **Proceedings of the first international joint conference on Autonomous agents and multiagent systems: part 1**

Full text available:  [pdf\(200.85 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Supervised interaction is concerned with the problem of establishing trust between contracting agents in electronic markets. Agents act as representatives of their organisations or of individuals, negotiate contracts for the supply of goods and services and manage their delivery. It is essential for the automation of business transactions to put safeguards in place that ensure that errant behaviour is either prevented or sanctioned. The model proposed in the paper - Supervised Interaction - consists ...

9 Session 2A: markets and auctions I: Risk and expectations in a-priori time allocation in multi-agent contracting

Alexander Babanov, John Collins, Maria Gini

July 2002 **Proceedings of the first international joint conference on Autonomous agents and multiagent systems: part 1**

Full text available:  [pdf\(228.23 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In related research we have proposed a market architecture for multi-agent contracting and we have implemented prototypes of both the market architecture and the agents in a system called MAGNET. A customer agent in MAGNET solicits bids for the execution of multi-step plans, in which tasks have precedence and time constraints, by posting a

Request for Quotes to the market. The Request for Quotes needs to include for each task its precedence constraints and a time window. In this paper, we study ...

12 Rethinking the design of the Internet: the end-to-end arguments vs. the brave new world

Marjory S. Blumenthal, David D. Clark

August 2001 **ACM Transactions on Internet Technology (TOIT)**, Volume 1 Issue 1

Full text available:  [pdf\(176.33 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This article looks at the Internet and the changing set of requirements for the Internet as it becomes more commercial, more oriented toward the consumer, and used for a wider set of purposes. We discuss a set of principles that have guided the design of the Internet, called the end-to-end arguments, and we conclude that there is a risk that the range of new requirements now emerging could have the consequence of compromising the Internet's original design principles. Were ...

13 Communication design for electronic negotiations on the basis of XML schema

Michael Ströbel

April 2001 **Proceedings of the tenth international conference on World Wide Web**

Full text available:  [pdf\(214.16 KB\)](#) Additional Information: [full citation](#), [references](#), [index terms](#)

Keywords: XML, application framework, electronic negotiation, ontology

14 Automated negotiation for order transaction of injection mold manufacturer

Young Jae Park, Hyung Rim Choi, Hyun Soo Kim

September 2003 **Proceedings of the 5th international conference on Electronic commerce**

Full text available:  [pdf\(475.22 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Today, there are several markets in cyber space where companies trade electronically due to the development of Information Technology. On the other hand, the most important thing in trades is negotiation. So, in order to support current business practices as well as new ones on the Internet, electronic commerce systems need an ability to negotiate. In this paper, proposed is a method by which a seller can be supported by an agent which plays a

role in negotiation process among small and medium c ...

15 Content-triggered trust negotiation

Adam Hess, Jason Holt, Jared Jacobson, Kent E. Seamons

August 2004 **ACM Transactions on Information and System Security (TISSEC)**, Volume 7 Issue 3

Full text available:  pdf(815.36 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The focus of access control in client/server environments is on protecting sensitive server resources by determining whether or not a client is authorized to access those resources. The set of resources is usually static, and an access control policy associated with each resource specifies who is authorized to access the resource. In this article, we turn the traditional client/server access control model on its head and address how to protect the sensitive content that clients disclose to and r ...

Keywords: Trust negotiation, access control, authentication, credentials

16 Ubiquitous WWW: The social contract core

James H. Kaufman, Stefan Edlund, Daniel A. Ford, Calvin Powers

May 2002 **Proceedings of the eleventh international conference on World Wide Web**

Full text available:  pdf(227.12 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The information age has brought with it the promise of unprecedented economic growth based on the efficiencies made possible by new technology. This same greater efficiency has left society with less and less time to adapt to technological progress. Perhaps the greatest cost of this progress is the threat to privacy we all face from unconstrained exchange of our personal information. In response to this threat, the World Wide Web Consortium has introduced the "Platform for Privacy Preferences" (...

17 Benefits and strategies of implementing educational software site licenses

Gordana Brouillette, Cindy Stewart

November 2002 **Proceedings of the 30th annual ACM SIGUCCS conference on User services**

Full text available:  pdf(402.09 KB) Additional Information: [full citation](#), [abstract](#)

Educational Software Site Licensing has become an integral component of IT services on many campuses today. Our department, Computing and Network Services (CNS) at the University of Alberta has developed long-standing working relationships with a wide variety of software vendors. As a result we are able to provide our University of Alberta clients (teaching, administration, research and students) with valuable and economical educational software. The range of software is from everyday desktop to ...

18 Agent mediated electronic commerce research at Hewlett Packard Labs, Bristol

Chris Preist

June 2001 **ACM SIGecom Exchanges**, Volume 2 Issue 3

Full text available:  pdf(151.18 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Agent technology is a key enabling component in bringing about Hewlett-Packard e-services vision, and for that reason, HP Labs is making significant investments in research in this area. Work on agent technology at HP labs includes agent-mediated B2B e-commerce,

distributed agent-based personalization, agent-based trading of Internet bandwidth, automated auction design, mobile agents, user profiling and FIPA standardization activities, among other things. In this article, we describe our work on ...

19 Computer-supported negotiations: an experimental study of bargaining in electronic commerce

Khim-Yong Goh, Hock-Hai Teo, Haixin Wu, Kwok-Kee Wei

December 2000 **Proceedings of the twenty first international conference on Information systems**

Full text available:  [pdf\(334.55 KB\)](#) Additional Information: [full citation](#), [references](#), [index terms](#)

20 A comprehensive agent: mediated e-market framework

Nehemiah Mavetera, Armstrong Kadyamatimba

September 2003 **Proceedings of the 5th international conference on Electronic commerce**

Full text available:  [pdf\(108.38 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#)

This paper discusses an agent-mediated e-market framework. The framework highlights the different stages and components that require automation and are required for the implementation of a full e-market system using agent technology. Most of these e-market aspects have been discussed, prototypes developed into systems but they exist as separate entities lacking a common protocol for implementation. No attention has been paid to the problem of how e-market component systems can be integrated into ...
